

WORKPLACE HEALTH AND SAFETY POLICY

We aim to lead the way in work health and safety (WHS) within our industry. Members of AEDI apply quality and safety standards that have been established to protect our clients, our contractors, our employees and members of the public. The philosophy of our AEDI is to ensure that our work is undertaken safely, with a high level of integrity and quality.

This is achieved by maintaining a Integrated Management System (IMS) which incorporates and enables compliance to the requirements of AS/NZS 4801:2001, and covers the activities of our operation.

The IMS has the objective of eliminating work-related injury and illness by:

- Conforming to legislative requirements, being the Act, Regulations or Codes of Practice;
- Managing risks associated with our business activities;
- Providing and maintaining a work environment without risks to health and safety;
- Providing and maintaining safe plant and structures;
- Providing and maintaining safe systems of work;
- Ensuring the safe use handling and storage of plant structures and chemicals;
- Providing adequate facilities for the welfare at work of workers in carrying out work for AEDI, including ensuring access to those facilities;
- Providing any information training, instruction or supervision that is necessary;
- Monitoring the health of workers and the conditions at the workplace for the purpose of preventing illness or injury of workers arising from work performed by AEDI; and
- Establishing measurable objectives and targets to chart our progress.

We request the personal cooperation and commitment of people working within our Organisation, whether they are employees, contractors or clients, to help us achieve our "Zero Harm" objective.
